

767 Glacial: Single Pendant Light

Form No. 767 in the Glacial Series is a variation on our popular Swell pattern, with a beautiful distorted band that travels across the frosted glass globe. The Glacial style softens the light and the appearance of the bulb through frosted glass and is a great choice for those who find glass lighting to have some glare. The band is added to the glass by hand, and no two pieces are the same. This design works well in many different styles of décor including, traditional, transitional, beach style, modern, or contemporary.

The middle size of our 700 series, these pendants work great on their own or fantastic as a grouping of lights.
